

UC Berkeley Summer Research Program for Undergraduates

2015

June 22 - August 14
Berkeley, CA

Undergraduates are invited to apply for an intensive 8-week program of research in one of the two following projects in geometry and topology:

- topology of Schubert varieties and their degenerations, or
- curvature shortening flows in the plane.

The program will include:

- dedicated introductory mini-courses on topics in differential geometry and algebraic topology/algebraic geometry,
- weekly presentation and project communication opportunities,
- potential computer programming interactions,
- social activities in the beautiful setting of the San Francisco Bay Area.

Applications must be submitted at
www.mathprograms.org

The application deadline is February 27th, 2015.
